- Volume of tuition:
- Capacity: unlimited
- State: taught
- Language: English
- Teaching: full-time
- Level:

Additional information includes: Guarantee: PhDr. Hlaváček Michal, Ph.D.; Pre-requisite: JEB004; and Is a pre-requisite for: JEB010. There are checkboxes for "Examinations terms - registration" and "Timetable".

The "Annotation" section (English) states: "The course acquaints students with macroeconomic indexes and with national accounts system. Behaviour of the economy in the long run and short run is explained, especially with concern to generation, distribution and allocation of national income. The course also solves problems of small open economy."

The "Syllabus" section (English) lists the following topics:

- (1) What is macroeconomics. Economic theories and models. Methods. Business cycles, price level and natural GDP, long and short time horizon. Stabilization politics.
- (2) Measurement of economic activity, price changes and unemployment. National income accounts. Flow of funds. I-O analysis.
- (3) General classical model.
- (4) Effective demand. Consumption and investment. Income-expenditure model.
- (5) Liquidity preference theory. IS-LM model.
- (6) AD-AS model. AD curve. AS curve.
- (7) General Keynesian model. Liquidity and investment trap.

Please be aware of the fact that SIS also serves as an archive of all the subjects that have been taught at the Faculty of Social Sciences since SIS went online in 2004. It is thus entirely possible that some classes listed in SIS are not taught anymore, that some are available only in Czech, and/or that some classes taught in English are not intended for ERASMUS students. Please, therefore, crosscheck the information in SIS with other sources regarding the availability of classes. **General explanation available in Notes on Class Codes at Charles University Faculty of Social Sciences on General student info - Understanding class codes page (<http://intraneteng.fsv.cuni.cz/FSVINTEN-48.html>)** Please always double-check the language of instruction.
